| [A] | [B] | [C] | rate |
| :---: | :---: | :---: | :---: |
| 0.10 M | 0.10 M | 0.10 M | $1.4 \times 10^{-4} \mathrm{M} / \mathrm{s}$ |
| 0.20 M | 0.10 M | 0.10 M | $2.8 \times 10^{-4} \mathrm{M} / \mathrm{s}$ |
| 0.37 M | 0.25 M | 0.10 M | $8.09 \times 10^{-3} \mathrm{M} / \mathrm{s}$ |
| 0.37 M | 0.25 M | 0.05 M | $3.24 \times 10^{-2} \mathrm{M} / \mathrm{s}$ |

For the data given above, find the order of the reaction with respect to the indicated species.

1. A
2. $B$
3. C
4. Assume the reaction does not depend on any other species besides A, B, and C. Write the expression for the rate of the reaction in terms of the rate constant k .
5. Calculate the rate constant k .
6. If $\mathrm{A}=10^{8} \mathrm{M}^{-1} \mathrm{~s}^{-1}$ and $\mathrm{T}=298 \mathrm{~K}$, what is $\mathrm{E}_{\mathrm{a}}$ for this reaction?

You start out with 1.0 M A. Assume the rate of the reaction $2 \mathrm{~A} \rightarrow \mathrm{~A}_{2}$ depends only one [A]. Assume that $A=3.4 \times 10^{8}$ (units depend on the order), $E_{a}=65 \mathrm{~kJ} / \mathrm{mol}$, and $T=298 \mathrm{~K}$. If the reaction is the given order in $A$, calculate the amount of $A$ left after five minutes and the half-life of $A$.
7. Zeroth order
8. First order
9. Second Order
10. For a (a) zeroth, (b) first, and (c) second order reaction, a plot of $\qquad$ vs. t is linear.
11. The reaction $3 \mathrm{~A}+5 / 2 \mathrm{~B} \rightarrow 2 \mathrm{C}+4 \mathrm{D}$ has a rate constant k of $3.7 \times 10^{-6} \mathrm{M}^{-2} \mathrm{~s}^{-1}$ at 298 K and 6.80 x $10^{-2} \mathrm{M}^{-2} \mathrm{~s}^{-1}$ at 600 K . Calculate the activation energy $\mathrm{E}_{\mathrm{a}}$ for this reaction.
12. Calculate the pre-exponential factor A for the reaction in \#11.
13. What would be k for the reaction in $\# 11$ at $0^{\circ} \mathrm{C}$ ?
14. Write the rate expression for the following multi-step reaction.

| $\mathrm{O}_{3} \rightarrow \mathrm{O}_{2}+\mathrm{O}$ | fast |
| :--- | :--- |
| $\mathrm{O}+\mathrm{O}_{3} \rightarrow 2 \mathrm{O}_{2}$ | slow |
| $2 \mathrm{O}_{3} \rightarrow 3 \mathrm{O}_{2}$ | overall |

15. Write the rate expression for the following multi-step reaction.

$$
\left(\mathrm{CH}_{3}\right)_{3} \mathrm{CBr} \rightarrow(\mathrm{CH})_{3} \mathrm{C}^{+}+\mathrm{Br}^{-} \quad \text { slow }
$$

$\left(\mathrm{CH}_{3}\right)_{3} \mathrm{C}^{+}+\mathrm{H}_{2} \mathrm{O} \rightarrow\left(\mathrm{CH}_{3}\right)_{3} \mathrm{COH}_{2}{ }^{+}$fast
$\left(\mathrm{CH}_{3}\right)_{3} \mathrm{COH}_{2}^{+}+\mathrm{H}_{2} \mathrm{O} \rightarrow\left(\mathrm{CH}_{3}\right)_{3} \mathrm{COH}+\mathrm{H}_{3} \mathrm{O}^{+}$fast
$\left(\mathrm{CH}_{3}\right)_{3} \mathrm{CBr}+2 \mathrm{H}_{2} \mathrm{O} \rightarrow\left(\mathrm{CH}_{3}\right)_{3} \mathrm{COH}+\mathrm{Br}^{-}+\mathrm{H}_{3} \mathrm{O}^{+} \quad$ overall
16. Write the rate expression for the following multi-step reaction.

| $\mathrm{H}_{2} \mathrm{O}_{2}+\mathrm{Br}_{2} \rightarrow 2 \mathrm{H}^{+}+\mathrm{O}_{2}+2 \mathrm{Br}^{-}$ | slow |
| :--- | :--- |
| $2 \mathrm{H}^{+}+2 \mathrm{Br}^{-}+\mathrm{H}_{2} \mathrm{O}_{2} \rightarrow \mathrm{Br}_{2}+2 \mathrm{H}_{2} \mathrm{O}$ | fast |
| $2 \mathrm{H}_{2} \mathrm{O}_{2} \rightarrow 2 \mathrm{H}_{2} \mathrm{O}+2 \mathrm{O}_{2}$ | overall |

17. The above plot represents the energy profile of a reaction that involves breaking an $\mathrm{O}-\mathrm{O}$ bond in terms of the $\mathrm{O}-\mathrm{O}$ bond distance (treat this is a general "reaction coordinate"). Assume this is in 1 L of solution, so $1 \mathrm{~kJ} \mathrm{M}^{-1}=1 \mathrm{~kJ} \mathrm{~mol}^{-1}$. Approximately what is $\Delta \mathrm{G}$ for this reaction? What is $\mathrm{E}_{\mathrm{a}}$ ?
18. What is $\mathrm{E}_{\mathrm{a}}$ for the reverse reaction?
19. Assume the reaction described by the plot is a simple reaction of the form $\quad A \rightarrow B+C$ and is first order overall and first order in A. The reaction rate when $[\mathrm{A}]=0.235 \mathrm{M}$ is found to be $1.4 \times 10^{-3}$ $\mathrm{M} / \mathrm{s}$. What is k for this reaction?
20. What is the preexponential factor A for the above reaction?
